Dear Sir,

Greetings, I'm Arman Mahmud, a research assistant at ARCED Foundation in Dhaka, Bangladesh.

I'm very interested in working with your Stata "sendemails" package. I'm hoping to integrate it with a Stata dialog box and then upload it to GitHub for non-commercial use. However, I haven't been able to find the package on GitHub to fork it.

Could you please let me know if it's possible for me to write another program that will integrate a dialog box using this package?

Thank you for your time and consideration.

Best regards,
Arman

Dear Arman

Thank you for reaching out.

I did not use Github; you can download the package from within Stata--when connected to internet:
net describe pr0078, from(<http://www.stata-journal.com/software/sj24-1>)

The Stata dialog box is a cool idea.

Good luck with this project.

Please keep me updated; also, I would be grateful if, in your work, you reference to the Stata Journal article that discusses this package.

Many thanks!

Dear Sir,

Thank you for your reply. I have completed my new project using your pr0078 packages. You can check this on [GitHub](#).
I would greatly appreciate any feedback you could offer to help me improve it.

Best regards,

Arman
